DETAILED ACTION

Allowable Subject Matter

1. Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance: Though the prior art teaches the use of resistors that can increase the current in a circuit (pull-up resistors), the prior art does not each, nor render obvious a resistor used to increase the current flowing through a contact of a level sender unit in order to increase accuracy of measurements, as claimed in claim 1 of the present invention. Further, the use of a means to regulate the current flowing through the level measuring resistor, via a pull down or a pull up resistor or a coil connected in series with the level sensing resistor, as in claims 2, 5, 6, and 9-12, is not disclosed nor deemed obvious in view of the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
